

1. Record Nr.	UNINA9910367738703321
Titolo	Diagnosis of Dementia and Cognitive Impairment
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2019
ISBN	3-03921-885-9
Descrizione fisica	1 online resource (140 p.)
Disciplina	616.8/31075
Soggetti	Medicine and Nursing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>In this special issue of <i>Diagnostics</i>, expert contributors have produced up-to-date research studies and reviews on various topics related to the diagnosis of dementia and cognitive impairment. The methods of the assessments discussed extend from simple neurological signs, which may be elicited in the clinical encounter, through cognitive screening instruments, to sophisticated analyses of neuroimaging and cerebrospinal fluid biomarkers of disease. It is hoped that these various methods may facilitate earlier diagnosis of dementia and its subtypes, and provide differential diagnosis of depression and functional cognitive disorders, as a prelude to meaningful interventions.</p>

Titolo	The Geology of Iberia: A Geodynamic Approach : Volume 5: Active Processes: Seismicity, Active Faulting and Relief / / edited by Cecilio Quesada, José Tomás Oliveira
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-10931-3
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (143 pages)
Collana	Regional Geology Reviews, , 2364-6446
Disciplina	557.3 554.6
Soggetti	Natural disasters Geology Geophysics Natural Hazards
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1. Preface -- 2. Active processes in Iberia: An Introduction -- 3. Active deformation in the Iberian Peninsula from geodetic techniques -- 4. Seismicity of the Iberian Peninsula -- 5. Active faults in Iberia -- 6. Active landscapes of Iberia.
Sommario/riassunto	Adopting a global approach, this unique book provides an updated review of the geology of Iberia and its continental margins from a geodynamic perspective. Owing to its location close to successive plate margins, Iberia has played a pivotal role in the geodynamic evolution of the Gondwanan, Rheic, Pangea, Tethys and Eurasian plates over the last 600 Ma of Earth's history. The geological record starts with the amalgamation of Gondwana in the Neoproterozoic, which was succeeded by the rifting and spreading of the Rheic ocean; its demise, which led to the amalgamation of Pangea in the late Paleozoic; and the rifting and spreading of several arms of the Neotethys ocean in the Mesozoic Era and their ongoing closure, which was responsible for the Alpine orogeny. The significant advances in the last 20 years have increasingly attracted international interest in exploring the geology of

the Iberian Peninsula. This final volume of the Geology of Iberia focuses on the active geological processes in Iberia including seismicity and active faulting as well as the modern landscapes in the Iberian Peninsula.
