

1. Record Nr.	UNINA9910367755903321
Autore	Liu Richeng
Titolo	Fluid Flow in Fractured Porous Media . Volume 1
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2019
ISBN	3-03921-424-1
Descrizione fisica	1 electronic resource (578 p.)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>The fluid flow in fracture porous media plays a significant role in the assessment of deep underground reservoirs, such as through CO₂ sequestration, enhanced oil recovery, and geothermal energy development. Many methods have been employed—from laboratory experimentation to theoretical analysis and numerical simulations—and allowed for many useful conclusions. This Special Issue aims to report on the current advances related to this topic. This collection of 58 papers represents a wide variety of topics, including on granite permeability investigation, grouting, coal mining, roadway, and concrete, to name but a few. We sincerely hope that the papers published in this Special Issue will be an invaluable resource for our readers.</p>
