Constraints, Benefits and Opportunities -- 10. The Future of African Unification: Vision and Path.
Sommario/riassunto	This book examines the historical antecedents of Pan-Africanism as a driving force of African Unity, carefully studying its major contributors, current institutional status, and potential future growth. It analyzes the facilitative role of emerging technologies, such as high performance computing, telecommunications, and satellite remote sensing in enabling African sustainable development. Finally, the authors discuss possible ways that the vision of Pan-Africanism can be used today in Africa's efforts towards unity and sustainable development. Thierno

Thiam is Associate Professor of Political Science and Chair of the Department of History and Political Science at Tuskegee University, USA. His academic and professional career spans across several major universities and institutions, including the University of Dakar, Howard University, the University of Maryland, Purdue University, and the Institute for State Effectiveness, Washington, D.C., USA.
