Development Aid for Health from China to Uganda -- 7. Effectiveness of the Development Aid for Health from China to Uganda -- 8. A Deeper Understanding of Development Aid for Health from China to Uganda -- 9. Conclusion: From Aid to Cooperation: New Opportunities.
Sommario/riassunto	This inspiring book looks at the theory and practice of China's foreign aid in Africa, especially in the area of healthcare in Uganda. It provides insights into how recipient countries and regions are selected, and describes in detail how the men and women working in the frontlines deliver aid. Information from past research, participant observations, interviews and other fieldwork are brought together to form a comprehensive picture of how Chinese development aid for health to Uganda has evolved over three decades, how it is carried out now, and

the significance of such milestones as the building of the China-Uganda Friendship Hospital. The author also compares and contrasts China's foreign aid with that from other countries. Zeqi Qiu is a Professor at Peking University, China. .
