

1. Record Nr.	UNINA9910369954803321
Titolo	Atlas of Cytopathology and Radiology [[electronic resource] /] / edited by Ritu Nayar, Xiaoqi Lin, Ajit S. Paintal, Ramona Gupta, Albert A. Nemcek Jr
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-24756-2
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (XIV, 251 p. 229 illus., 129 illus. in color.)
Disciplina	616.07
Soggetti	Pathology Neoplasms - diagnosis Cytodiagnosis - methods Cells - pathology Radiology, Interventional Atlas.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	An Introduction to Radiology and Cytopathology Considerations in a Collaborative Biopsy Service -- Liver -- Lungs, Mediastinum, and Pleura -- Lymph Nodes and Spleen -- Kidney, Adrenal Gland, and Paraganglia -- Pelvis, Peritoneum, and Omentum -- Esophagus, Gastrointestinal Tract, and Pancreas -- Thyroid, Parathyroid, Head, and Neck -- Salivary Glands -- Bone and Soft Tissue Tumors -- The Breast.
Sommario/riassunto	The diagnostic services—pathology and radiology—are the cornerstone for supporting the delivery of high-quality healthcare by providing timely and accurate diagnosis. In this era of precision medicine, it has become increasingly important for these two services to work collaboratively in supporting patients and clinical colleagues by informing and communicating the selection and interpretation of appropriate diagnostic tests, as well as obtaining adequate tissue for diagnosis, prognostication, and therapy at initial presentation and, if required, during disease progression/relapse. This book is aimed at practicing cytopathologists and interventional radiologists as well as

trainees in these areas. An essential requirement in the accurate diagnosis of these mass lesion biopsies is the correlation of cytomorphology with the radiological findings and adequate triage of acquired material during the biopsy procedure. The cytologic findings, gross surgically resected specimens, and imaging findings are illustrated to provide a complete pathologic-radiologic correlation of the entities discussed. This Atlas of Cytopathology and Radiology serves as a useful guide for pathologists and radiologists in the appropriate triage and diagnosis of deep seated mass lesions biopsied under ultrasound, CT Scan or fluoroscopic guidance.
