Sommario/riassunto	This book discusses a broad selection of interesting cases of fine needle aspiration cytology (FNAC), which offer valuable insights into the diagnosis of cytology cases in routine practice. It provides the salient clinical history along with representative microphotographs of the routine smears. The content is divided into 100 chapters, with each chapter covering an individual case in detail. The book also addresses immunocytochemistry and other ancillary techniques that can help to diagnose lesions. Richly illustrated with more than 900 images, the book offers a valuable guide to diagnosis and self-evaluation for students/trainees/examinees of pathology and cytology practitioners alike.
