

1. Record Nr.	UNINA990001778470403321
Autore	Bortolini, Enrico
Titolo	Gestione del suolo per un'agricoltura sostenibile / Enrico Bortolini, Raffaele Cavalli, Alberto Valier
Pubbl/distr/stampa	Bologna : Edagricole, 1992
ISBN	88-206-3706-5
Descrizione fisica	VIII, 65 p. ; 30 cm
Altri autori (Persone)	Cavalli, Raffaele Valier, Alberto
Disciplina	631.4
Locazione	FAGBC
Collocazione	60 631.4 A 1
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910372782903321
Autore	Frugis Giovanna
Titolo	Plant Development and Organogenesis: From Basic Principles to Applied Research
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2020
ISBN	3-03928-127-5
Descrizione fisica	1 online resource (246 p.)
<hr/>	
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
<hr/>	
Sommario/riassunto	<p>The way plants grow and develop organs significantly impacts the overall performance and yield of crop plants. The basic knowledge now available in plant development has the potential to help breeders in generating plants with defined architectural features to improve productivity. Plant translational research effort has steadily increased over the last decade due to the huge increase in the availability of crop genomic resources and <i>Arabidopsis</i>-based sequence annotation systems. However, a consistent gap between fundamental and applied science has yet to be filled. One critical point often brought up is the unreadiness of developmental biologists on one side to foresee agricultural applications for their discoveries, and of the breeders to exploit gene function studies to apply to candidate gene approaches when advantageous on the other. In this book, both developmental biologists and breeders make a special effort to reconcile research on the basic principles of plant development and organogenesis with its applications to crop production and genetic improvement. Fundamental and applied science contributions intertwine and chase each other, giving the reader different but complementary perspectives from only apparently distant corners of the same world.</p>
