| Sommario/riassunto | Berger's slim, user-friendly volume on academic writing is a gift to linguistically-stressed academics. Author of 60 published books, the |

author speaks to junior scholars and graduate students about the process and products of academic writing. He differentiates between business writing skills for memos, proposals, and reports, and the scholarly writing that occurs in journals and books. He has suggestions for getting the "turgid" out of turgid academic prose and offers suggestions on how to best structure various forms of documents for effective communication. Written in Berger's friendly, personal style, he shows by example that academics can write good, readable prose in a variety of genres.

| Sommario/riassunto | This book focuses on seven of the most important formal methods used to interpret the New Testament today. Several of the chapters also touch on Old Testament/Hebrew Bible interpretation. In line with the multiplicity of methods for interpretation of texts in the humanities in general, New Testament study has never before seen so many different methods. This situation poses both opportunities and challenges for scholars and students alike. The articles in this book introduce the latest methods and give examples of these methods at work. The seven methods are as follows: post-colonial, narrative, historical, performance, mathematical analysis of style; womanist; and ecological. |
