

1. Record Nr.	UNINA9910786832503321
Autore	Pearson Mike
Titolo	Mickery Theater : an imperfect archaeology / / Mike Pearson ; reviews by Jac Heijer and Loek Zonneveld ; translated by Paul Evans
Pubbl/distr/stampa	Amsterdam, Netherlands : , : Amsterdam University Press, , 2011 ©[2011]
ISBN	90-485-1410-X
Descrizione fisica	1 online resource (316 p.)
Disciplina	792.0223
Soggetti	Experimental theater - History - 20th century Theater - History - 20th century
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Sommario/riassunto	<p>This is the first full-length study of the history and working practices of the Mickery Theater in Amsterdam. Between 1965 and 1991, under its noted director Ritsaert ten Cate, Mickery became renowned worldwide for promoting and presenting significant international alternative theatre companies, and for staging its own innovative productions. Through a unique "archaeological" approach, combining archival research, oral history, and field observation, this book establishes the singular importance of Mickery and evokes the unique atmosphere of both the building and the activities it nurtured.</p>

2. Record Nr.	UNINA9910372786403321
Autore	Downie Laura
Titolo	Nutrition and Eye Health
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2020
ISBN	3-03921-991-X
Descrizione fisica	1 online resource (242 p.)
Soggetti	Biology, life sciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Blindness and visual impairment impact significantly on an individual's physical and mental well-being. Loss of vision is a global health problem, with approximately 250 million of the world's population currently living with vision loss, of which 36 million are classified as blind. Visual impairment is more frequent in the elderly, with cataract and age-related macular degeneration (AMD) accounting for over 50% of cases globally. Oxidative stress has been strongly implicated in the pathogenesis of both conditions, and consequently the role of nutritional factors, in particular carotenoids and micronutrient antioxidants, have been investigated as possible preventative or therapeutic strategies. Dry eye syndrome (DES) is one of the most common ophthalmic conditions in the world. DES occurs where the eye does not produce enough tears and/or the tears evaporate too quickly leading to discomfort and varying degrees of visual disturbance. There has recently been a great deal of interest in the potential for oral or topical supplementation with essential fatty acids (EFAs), specifically omega-3 and omega-6 fatty acids, as an adjunct to conventional treatments for DES. The objective of this Special Issue on 'Nutrition and Eye Health' is to publish papers describing the role of nutrition in maintaining eye health and the use of nutritional interventions to prevent or treat ocular disease. A particular (but not exclusive) emphasis will be on papers (reviews and/or clinical or experimental studies) relating to cataract, AMD and DES.</p>
