

1. Record Nr.	UNINA9910372786803321
Autore	Kaimakamis George
Titolo	Geometry of Submanifolds and Homogeneous Spaces
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2020
ISBN	3-03928-001-5
Descrizione fisica	1 electronic resource (128 p.)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>The present Special Issue of Symmetry is devoted to two important areas of global Riemannian geometry, namely submanifold theory and the geometry of Lie groups and homogeneous spaces. Submanifold theory originated from the classical geometry of curves and surfaces. Homogeneous spaces are manifolds that admit a transitive Lie group action, historically related to F. Klein's Erlangen Program and S. Lie's idea to use continuous symmetries in studying differential equations. In this Special Issue, we provide a collection of papers that not only reflect some of the latest advancements in both areas, but also highlight relations between them and the use of common techniques. Applications to other areas of mathematics are also considered.</p>

2. Record Nr.	UNINA9910782690503321
Titolo	The Britannica guide to climate change : an unbiased guide to the key issue of our age // introduction by Robert M. May
Pubbl/distr/stampa	London, : Robinson Philadelphia, : Running Press, 2008 London : , : Robinson Philadelphia : , : Running Press, , 2008
ISBN	1-281-95817-4 9786611958176 1-59339-848-4
Descrizione fisica	1 online resource (xvi, 460 pages) : illustrations, maps
Collana	Britannica guide series
Disciplina	355.03 551.6
Soggetti	Climatic changes
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based on print version record. Includes index.
Nota di contenuto	Contents; Introduction; Part 1 The big picture; 1 Climate change: a short introduction; 2 What is climate?; 3 A history of weather forecasting; Part 2 The changing world; 4 The changing planet: land; 5 The changing planet: hydrosphere; 6 The changing planet: atmosphere; 7 The decline in biodiversity; Part 3 Ideas, arguments, and progress; 8 Environmentalism: past, present, and future; 9 Key environmental thinkers; 10 Responses to change; Index; A; B; C; D; E; F; G; H; I; J; K; L; M; N; O; P; R; S; T; U; V; W
Sommario/riassunto	There are a few subjects that divide opinion more than climate change. What is the truth? Can the solution be found in a global political treaty or individual action? This Britannica guide gives a clear overview of the scientific evidence, from data showing how the atmosphere has changed in the last 4.5 billion years to more recent studies on the symptoms of a warming planet and the global effects of greenhouse gases, deforestation, and population. The guide introduces you to the possible solutions and to key figures in the debate, from the origins of
