

1. Record Nr.	UNINA9910142730603321
Titolo	Country exposure lending survey / Federal Financial Institutions Examination Council
Pubbl/distr/stampa	Washington, DC, 2001-
Descrizione fisica	Online-Ressource
Disciplina	330 310
Soggetti	Zeitschrift Statistik
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico

2. Record Nr.	UNINA9910372786803321
Autore	Kaimakamis George
Titolo	Geometry of Submanifolds and Homogeneous Spaces
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2020
ISBN	3-03928-001-5
Descrizione fisica	1 online resource (128 p.)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The present Special Issue of Symmetry is devoted to two important areas of global Riemannian geometry, namely submanifold theory and the geometry of Lie groups and homogeneous spaces. Submanifold theory originated from the classical geometry of curves and surfaces. Homogeneous spaces are manifolds that admit a transitive Lie group

action, historically related to F. Klein's Erlangen Program and S. Lie's idea to use continuous symmetries in studying differential equations. In this Special Issue, we provide a collection of papers that not only reflect some of the latest advancements in both areas, but also highlight relations between them and the use of common techniques. Applications to other areas of mathematics are also considered.
