

1. Record Nr.	UNINA9910372787203321
Autore	Goebel Jürgen W
Titolo	Einwilligungserklärung und Forschungsinformation zur Gewinnung tierischer Proben
Pubbl/distr/stampa	Berlin, : MWV Medizinisch Wissenschaftliche Verlagsgesellschaft, 2012
ISBN	3-95466-516-6
Descrizione fisica	1 online resource (198)
Collana	Schriftenreihe der TMF - Technologie- und Methodenplattform für die vernetzte medizinische Forschung e. V., Bd. 10
Soggetti	Veterinary medicine: infectious diseases & therapeutics Electronic books.
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	" Infectious agents that can be transmitted from animals to humans and cause so-called zoonoses are the subject of numerous research projects. In order to better understand, combat and monitor these pathogens, animal samples are taken for scientific studies. In this context, legal and data protection issues arise that are the subject of this legal expertise. It serves to give researchers legal certainty when taking and processing animal samples as well as when creating research information and declarations of consent. The book explains which legal issues are affected in the scientifically relevant sampling scenarios and in the further processing of sample accompanying data. The range of topics extends from the obligation to notify and report animal diseases to usage and exploitation rights to the samples."
