Descrizione fisica	1 online resource (304)
Collana	Hors Collection
Soggetti	Agronomy & crop production
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The challenge for agricultural systems today is to produce whilst drastically reducing greenhouse gas emissions, in limited agricultural spaces where the biodiversity, quality of resources, soils, water, air, etc. all have to be protected. This collective work, published to mark the twentieth anniversary of the creation of the Inra Environment and Agronomy Department, takes stock of progress made in this area.
