Autore	Dinesh Kumar M.
Titolo	Assessing Wastewater Management in India / / by M. Dinesh Kumar, Cecilia Tortajada
Pubbl/distr/stampa	Singapore : , : Springer Singapore : , : Imprint : Springer, , 2020
ISBN	981-15-2396-7
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (XIV, 85 p. 7 illus. in color.)
Collana	SpringerBriefs in Water Science and Technology, , 2194-7244
Disciplina	628.3
Soggetti	Water - Pollution Environmental management Water quality Sustainable development Waste Water Technology / Water Pollution Control / Water Management / Aquatic Pollution Water Policy/Water Governance/Water Management Environmental Management Water Quality/Water Pollution Sustainable Development
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1 - Introduction -- Chapter 2 - The Legal, Institutional and Policy Regime for the Control of Water Pollution in India -- Chapter 3 - Status of Water Quality in India and Compliance with Pollution Control Norms -- Chapter 4 - Effectiveness of Wastewater Collection and Treatment Systems -- Chapter 5 - Health Impacts of Water Pollution and Contamination -- Chapter 6 - Reuse of Treated Wastewater: Present Scenario -- Chapter 7 - Wastewater Treatment Technologies and Costs -- Chapter 8 - Case Studies on Performance of Wastewater Treatment Systems -- Chapter 9 - Environmental Sustainability and Economic Viability -- Chapter 10 - Growth of Treatment Plants and Reuse of Treated Wastewater -- Chapter 11 - Market for Treated Wastewater in India -- Chapter 12 - Conclusions and Areas for Future Research. .
Sommario/riassunto	This book highlights the institutional, legal, and policy measures to

manage water pollution in India, and discusses how effective they have been in improving the overall quality of the country's surface and groundwater resources. It also reviews the status of wastewater generation, collection and treatment in urban areas to provide insights into the gaps in wastewater treatment. Further, it offers a detailed analysis of the wastewater treatment systems available and examines the human health impacts of water pollution in the country, as well as the future trajectory of investment in wastewater treatment systems and potential sectors for reuse and recycling of wastewater, briefly assessing the market demand for treated wastewater. Lastly, it investigates the factors influencing the environmental sustainability and economic viability of wastewater treatment as well as future areas of research in the field.
