Record Nr. UNINA9910373893703321 Accounts on Sustainable Flow Chemistry / / edited by Timothy Noël, **Titolo** Rafael Luque Pubbl/distr/stampa Cham:,: Springer International Publishing:,: Imprint: Springer,, 2020 **ISBN** 3-030-36572-7 Edizione [1st ed. 2020.] 1 online resource (VIII, 190 p. 162 illus., 95 illus. in color.) Descrizione fisica Topics in Current Chemistry Collections, , 2367-4067 Collana Disciplina 543.22 Soggetti Green chemistry Nanotechnology Chemical engineering Catalysis **Green Chemistry** Nanotechnology and Microengineering Industrial Chemistry/Chemical Engineering Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Nota di bibliografia Includes bibliographical references and index. Nota di contenuto Solar photochemistry in flow -- Supported Catalysts for Continuous Flow Synthesis -- The Use of Molecular Oxygen for Liquid Phase Aerobic Oxidations in Continuous Flow -- Sustaining the Transition from a Petrobased to a Biobased Chemical Industry with Flow Chemistry -- Continuous-Flow Microreactors for Polymer Synthesis: Engineering Principles and Applications. The series Topics in Current Chemistry Collections presents critical Sommario/riassunto reviews from the journal Topics in Current Chemistry organized in topical volumes. The scope of coverage is all areas of chemical science including the interfaces with related disciplines such as biology, medicine and materials science. The goal of each thematic volume is to give the non-specialist reader, whether in academia or industry, a comprehensive insight into an area where new research is emerging which is of interest to a larger scientific audience. Each review within the volume critically surveys one aspect of that topic and places it

within the context of the volume as a whole. The most significant

developments of the last 5 to 10 years are presented using selected examples to illustrate the principles discussed. The coverage is not intended to be an exhaustive summary of the field or include large quantities of data, but should rather be conceptual, concentrating on the methodological thinking that will allow the non-specialist reader to understand the information presented. Contributions also offer an outlook on potential future developments in the field.
