

1. Record Nr.	UNINA9910141565803321
Titolo	Current issues in intestinal microbiology
Pubbl/distr/stampa	Wymondham, Norfolk, UK, : Horizon Scientific Press, ©2000-
ISSN	1466-5328
Descrizione fisica	1 online resource
Disciplina	612.33
Soggetti	Intestines - Microbiology Microbiology Intestines - microbiology Periodicals. Periodical
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	Refereed/Peer-reviewed Title from cover.

2. Record Nr.	UNINA9910373936203321
Autore	Fife Wayne
Titolo	Counting as a Qualitative Method : Grappling with the Reliability Issue in Ethnographic Research / / by Wayne Fife
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Palgrave Pivot, , 2020
ISBN	9783030348038 3030348032
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (143 pages) : illustrations
Collana	Palgrave pivot
Disciplina	305.800723 306
Soggetti	Sociology - Methodology Ethnology Sociological Methods Sociocultural Anthropology Ethnography
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Chapter 1: The Reliability Issue -- Chapter 2: Creating a Counting Schedule -- Chapter 3: Success, Failure, and a Missed Opportunity -- Chapter 4: Counting Qualitative Results -- Chapter 5: Counting in the Archives -- Chapter 6: Tourism - Counting the Overlooked -- Chapter 7: Making Fiction Count -- Chapter 8: The Importance of Counting for Qualitative Research. .
Sommario/riassunto	"This book will be very valuable for teaching students how to use counting in the context of research and analysis in sociocultural anthropology. It is full of very vividly described examples from the author's own research that make the book's explanation of counting as a research method clear and engaging." -Vanessa Fong, Professor of Anthropology, Amherst College, USA This book aims to explore counting as an often-overlooked research tool for qualitative projects. Building off of a research method invented by the author in 1986 called counting schedules, this volume provides instruction on how to use counting not only to enhance fieldwork results, but also as a form of

analysis for extant field notes, interview results, self-reporting diaries or essays, primary archival material, secondary historical texts, government sources, and other documents and narratives, including fictional work. The author buttresses his discussion of counting schedules with extensive examples from previous fieldwork and research experiences, drawing on three decades of anthropological experience in Canada and the Pacific Islands. *Counting as a Qualitative Method* provides ethnographic researchers with the answer to the number-one question asked by qualitative and non-qualitative researchers alike: How can a qualitative researcher know his or her results are reliable?
