Soggetti	Neighborhood planning Urban older people
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This book brings together the emerging body of work on age-friendly neighbourhoods in Singapore, the Asia-Pacific region, Europe and North America. It begins with an overview chapter on the current state of policy, practice and research on age-friendly neighbourhoods in Singapore. This is followed by an annotated bibliography of published materials on age-friendly neighbourhoods in the above-mentioned countries and regions, encompassing theoretical work and empirical research reported on in journal articles, books and conference proceedings. The annotations for Singapore also map the grey literature, including unpublished dissertations and theses. The aim is to provide a sense of the scope of, issues in, and discourse on age-friendly neighbourhoods, the development of which is increasingly being recognised as a key strategy to support healthy ageing and enhance quality of life in ageing societies.
