Transplant -- 30. Surgical Oncology -- 31. Pediatric Surgery -- 32. Trauma/ACS.

Sommario/riassunto

This book provides an overview of the unique aspects related to a university based clinical practice. The development of relationships with senior colleagues and referring providers, building multidisciplinary programs within an academic institution, financing of academic medicine, and issues specific to the speciality are discussed. Building a Clinical Practice aims to highlight the importance of developing a successful clinical practice in an academic setting and to help guide readers through the challenges associated with that process. This book is relevant to senior surgical trainees and young surgical faculty who are facing the challenges associated with developing a clinical practice.
