

1. Record Nr.	UNINA9910375682403321
Autore	Igartua Monica Aguilar
Titolo	Proceedings of the 15th ACM International Symposium on Performance Evaluation of Wireless Ad Hoc, Sensor, & Ubiquitous Networks // Monica Aguilar Igartua ; Association for Computing Machinery-Digital Library
Pubbl/distr/stampa	New York : , : ACM, , 2018
Descrizione fisica	1 online resource (115 pages) : illustrations
Collana	ACM Conferences
Disciplina	004.165
Soggetti	Mobile computing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>It is our great pleasure to welcome you to the 15th ACM International Symposium on Performance Evaluation of Wireless Ad Hoc, Sensor, and Ubiquitous Networks (PE-WASUN'18) that takes place in Montreal, Canada, on October 28th - November 2nd, 2018. This year's ACM PE-WASUN symposium brings together scientists, engineers, and practitioners to share and exchange their experiences, discuss challenges, and report state-of-the-art and in-progress research on all aspects of wireless ad hoc, sensor, and ubiquitous networks with a specific emphasis on their performance evaluation and analysis. The mission of the symposium is to share novel approaches for monitoring, measuring, modeling, simulating, analyzing, optimizing and casestudying the characteristics of ad hoc, sensor, pervasive and ubiquitous networks, as well as exploring and developing new ad hoc networking protocols and tools. ACM PE-WASUN gives researchers and practitioners a unique opportunity to share their perspectives with others interested in the various aspects of performance evaluation. The call for papers attracted large number of submissions from Europe, Asia, Africa, North and South America. The technical program committee accepted 16 regular papers, which cover a variety of topics, including experimental analysis, simulation, design and performance evaluation of routing, vehicular and sensor networks. We hope that</p>

these proceedings will serve as valuable references for researchers and developers in the field of wireless ad hoc, sensor and ubiquitous networks. Putting together ACM PE-WASUN'18 was a team effort. First of all, we would like to thank the authors for providing the content of the program. We would like to express our gratitude to the program committee and external reviewers, who worked very hard in reviewing papers and providing suggestions for their improvements. Also we are grateful to our poster and publicity chairs for their good work. Finally, we would like to thank our sponsor, ACM and ACM SIGSIM for their continued support of these successful meetings.

2. Record Nr.	UNINA9910971082703321
Autore	Adibe Jideofor
Titolo	Freedom of speech v protection of reputation : public interest defence in American and English law of defamation / / by Jideofor Adibe
Pubbl/distr/stampa	London, : Adonis & Abbey, 2010
ISBN	9781909112810 190911281X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (109 p.)
Disciplina	346.73034

Sommario/riassunto

Good governance of public resources has a far reaching impact on development outcomes. Over time it has become clear that capitalism has excluded a larger part of society, leading to worsening development indicators. Cognisant of the limited participation of rural communities in development, Uganda introduced a decentralisation policy in 1992 in a bid to involve more communities in the development process. The policy transferred powers, responsibilities and resources to local governments. By devolving powers to district leaders, it was envisioned that the decentralisation policy would improve service delivery and political accountability. This book analyses the nexus between public expenditure, governance and development outcomes in Uganda. It presents several case studies in four sectors; agriculture, health, education and roads to demonstrate the interaction of various actors in the management of public expenditure within a political economy conceptual framework. Based on these, the book contends that a mere allocation of public resources without the appropriate functioning of institutions may limit the achievement of the desired development outcomes. Elijah Dickens Mushemeza is a Professor of Political Science and Development Studies at Ankole Western University and a Senior Consultant at Advocates Coalition for Development and Environment. George Bogere manages the Centre for Budget and Economic Governance at ACODE, before joining ACODE he worked as a Researcher at Makerere Institute of Social Research (MISR). Susan Kavuma is a Lecturer in the School of Economics at Makerere University and a Research Fellow at ACODE.
