Sommario/riassunto	<p>It has been my honor to chair this prestigious conference, a very relevant event in the field. Even though Distance Education has been an object of study for many years, there is still wide need of research and development in this field, because ever new issues emerge and new applications are developed. ICDL 2018 aimed to contribute in this respect by bringing together people interested in Distance Education and Learning from education professionals to policy makers, in areas that range from theoretical aspects to the practical design and ethics of distance education, as well as open & e-learning technological issues, domain applications and curriculum-related issues.</p>
