	Sommario/riassunto	The WearSys workshop is inspired by the fact that wearables are spearheading advancements in technology through inter-disciplinary research among a broad spectrum of disciplines such as mobile health, fashion, energy, just to name a few. The 4th ACM Workshop on wearable systems and applications, WearSys'2018, is focused on how wearable technologies can shape mobile computing, systems and applications research. The goal of this workshop is to provide a forum to bring together researchers and design experts to discuss how wearable technologies have, and can, complement mobile systems research, and vice-versa. It also aims to provide a launchpad for bold and visionary ideas for wearable systems research.
