

1. Record Nr.	UNINA9910376620603321
Autore	Chao Yen W.
Titolo	Proceedings of the 14th conference on Winter Simulation . Volume 1 // Yen W. Chao
Pubbl/distr/stampa	[Place of publication not identified] : , : Winter Simulation Conference, , 1982
Descrizione fisica	1 online resource
Disciplina	004
Soggetti	Electronic data processing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>WELCOME TO SAN DIEGO AND THE 1982 WINTER SIMULATION CONFERENCE We are pleased to present the Proceedings of the 1982 Winter Simulation Conference. A select group of simulation professionals labored long and hard to develop a high quality technical program for 1982. The primary objective of the Winter Simulation Conference is to emphasize current activities in discrete and combined discrete and continuous simulations. Over eighty papers were received from the various areas of the Western world. All contributed papers were reviewed by the program committee, most of whom are session chairpersons in this year's Winter Simulation Conference. So that all legitimate activities can be reported on, we have continued with the Winter Simulation Conference tradition to invite speakers with national reputations to present papers, set up panel sessions and present tutorials and the Advanced Practitioner sessions. Some of their sessions include on-line demonstration of software, thus, providing hands-on experience for the attendees. We also have birds-of-a-feather sessions. These are all scheduled after 5:30 pm.</p>
