1.

Record Nr.	UNINA9910376641903321
Autore	Inverardi Paola
Titolo	Proceedings of the 10th International Symposium on Software Engineering for Adaptive and Self-Managing Systems / / Paola Inverardi ; Association for Computing Machinery-Digital Library
Pubbl/distr/stampa	Piscataway, New Jersey : , : IEEE Press, , 2015
Descrizione fisica	1 online resource (186 pages)
Disciplina	005.1
Soggetti	Computer software - Development Software engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The 10th International Symposium on Software Engineering for Adaptive and Self-Managing Systems (SEAMS 2015) is being held in Firenze, Italy on 18-19 May 2015. Welcome to the proceedings! Many more domains are requiring software systems to be adaptive to changing contexts, environments and requirements, to be resilient in the face of uncertainty and error, and to be composed and managed at run time. SEAMS provides a venue to present novel self-adaptive applications and domains, and to formulate and discuss methods for engineering such systems in a methodical and assurable way.
