   Sommario/riassunto FMCAD 2010, held in Lugano Switzerland on October 20--23, was the
                     tenth in a series of conferences on the theory and applications of
                     formal methods in hardware and system verification. FMCAD provides a
                     leading forum to researchers in academia and industry for presenting
                     and discussing groundbreaking methods, technologies, theoretical
                     results, and tools for reasoning formally about computing systems.
                     FMCAD covers formal aspects of computer-aided system design
                     including verification, specification, synthesis, and testing.
