Sommario/riassunto

This volume of Eurasian Studies in Business and Economics includes selected papers from the 25th Business and Economics Society (EBES) Conference, held in Berlin, Germany, in May 2018. While the theoretical and empirical papers presented cover diverse areas of economics and finance from different geographic regions, the main focus is on the latest research in the economics of innovation, investment and risk management together with regional studies. The book also includes studies on law and regulation themes such as economic offences by women, formation of contracts via the internet and public tender for residents of communes.
