

1.	Record Nr.	UNISALENTO991000363869707536
	Autore	Hoyle, Joe Ben
	Titolo	Advanced accounting / Joe Hoyle
	Pubbl/distr/stampa	Burr Ridge : Irwin, c1994
	ISBN	9780256124071
	Edizione	[4. ed]
	Descrizione fisica	XXV, 1158 p. : ill. ; 25 cm
	Collana	Irwin series in undergraduate accounting
	Disciplina	657
	Soggetti	Contabilità
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910383823703321
	Titolo	Pressure injury, diabetes and negative pressure wound therapy // edited by Melvin A. Shiffman, Mervin Low
	Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
	ISBN	3-030-10701-9
	Edizione	[1st ed. 2020.]
	Descrizione fisica	1 online resource (XI, 319 p. 50 illus., 40 illus. in color.)
	Collana	Recent Clinical Techniques, Results, and Research in Wounds, , 2524-4590 ; ; 3
	Disciplina	617.1
	Soggetti	Surgery, Plastic Surgery Wound healing Plastic Surgery General Surgery
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia

Part 1: Pressure Injury -- Pressure Ulcers (Injury): Etiology, Prevention, Classification, Risk Assessment, Treatment -- The Use of Oxygen in the Treatment of Pressure Ulcers -- Less Invasive Surgical Technique for the Treatment of Unmanageable Pressure Ulcer with Pocket -- The Potential Role of Zinc Supplementation on Pressure Ulcer Healing in Older Adults -- Universal Pressure Ulcer Prevention Bundle with WOC Nurse Support: A Pressure Injury Prevention Journey -- Part 2: Diabetes -- Cellular and Molecular Mechanisms of Impaired Angiogenesis and Delayed Wound Healing in Type 2 Diabetes: Amelioration Using Sirna-Pluronic Acid-Based Technology FOXO1 has a Dual Function to Promote Normal but Inhibit Diabetic Wound Healing -- Nanohybrid Scaffolds for the Treatment of Diabetic Wounds -- Risk Factors for Lower Extremity Amputation in Patients with Diabetic Foot Ulcers -- Factors Maximizing Skin Flaps and Grafts for Diabetic Wound Coverage -- Diabetic Foot Infections -- Low Level Laser Therapy (LLLT) in Diabetes Mellitus for Wound Healing: Surgical Wound, Diabetic Ulcer and Burns -- Enzymatic Debridement of Chronic Nonischemic Diabetic Foot Ulcers -- Part 3: Negative Pressure Wound Therapy -- History of Negative-Pressure Wound Therapy -- The Use of NPWT in Treating Electrical Burn Wounds -- Negative Pressure Wound Therapy as Prophylaxis for Surgical Site Infection in Perineal Wounds -- Negative Pressure Wound Therapy: Principles and Usage in Orthopaedic Surgery -- Negative Pressure Wound Therapy for High-Risk Wounds -- In Lower Extremity Revascularization -- Clinical Experience with Negative-Pressure Wound Therapy Combined with Silver-Impregnated Dressing in Mixed Wounds -- Negative Pressure Wound Therapy In Abdominal Surgery -- How to Manage the Open Abdomen -- Negative-Pressure Wound Therapy -- Use of Negative-Pressure Wound Therapy on Malignant Wounds -- Combined Approach to Severe Fournier's Gangrene with Negative Pressure Wound Therapy, Dermal Regeneration and Split-Thickness Skin Graft -- Negative Pressure Wound Therapy to Decrease Surgical Nosocomial Events in Colorectal Resections.

Sommario/riassunto

This book introduces readers to the latest developments regarding pressure injury wounds, diabetic wounds, and negative pressure wound therapy. The first part exclusively deals with wounds from pressure ulcers, describing in detail their prevention, classification, and treatment. In turn, chapters addressing diabetic wounds form the middle part of the book. Here, the authors provide guidance on the medication and treatment (e.g. stem cells, laser) of patients suffering from this disease. The book's last part, which focuses on negative pressure wound therapy, addresses all major aspects of this approach, reflecting the latest research. Illustrated with a wealth of high-quality pictures throughout, the book offers a unique resource for both beginners and experienced plastic surgeons.
