

1. Record Nr.	UNINA9910383835203321
Titolo	Proceedings of the 4th International Conference on Electrical and Information Technologies for Rail Transportation (EITRT) 2019 : Rail Transportation Information Processing and Operational Management Technologies // edited by Baoming Liu, Limin Jia, Yong Qin, Zhigang Liu, Lijun Diao, Min An
Pubbl/distr/stampa	Singapore : , : Springer Singapore : , : Imprint : Springer, , 2020
ISBN	981-15-2914-0
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (X, 743 p.) : 417 illus., 282 illus. in color. ; online resource
Collana	Lecture Notes in Electrical Engineering, , 1876-1100 ; ; 640
Disciplina	625.263
Soggetti	Electric railroads Railroads - Communication systems Railroads - Information technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Novel Traction Drive Technologies of Rail Transportation -- Rail Transportation System Safety and Maintenance Technology -- Rail Transportation Information Technology -- Rail Transportation Operational Management Technology.
Sommario/riassunto	This book reflects the latest research trends, methods and experimental results in the field of electrical and information technologies for rail transportation, which covers abundant state-of-the-art research theories and ideas. As a vital field of research that is highly relevant to current developments in a number of technological domains, the subjects it covered include intelligent computing, information processing, Communication Technology, Automatic Control, etc. The objective of the proceedings is to provide a major interdisciplinary forum for researchers, engineers, academicians as well as industrial professionals to present the most innovative research and development in the field of rail transportation electrical and information technologies. Engineers and researchers in academia, industry, and the government will also explore an insight view of the solutions that combine ideas from multiple disciplines in this field. The

volumes serve as an excellent reference work for researchers and graduate students working on rail transportation, electrical and information technologies.
