

1. Record Nr.	UNINA9910383837803321
Titolo	Atlas of Operative Maxillofacial Trauma Surgery : Post-Traumatic Deformity // edited by Michael Perry, Simon Holmes
Pubbl/distr/stampa	London : , : Springer London : , : Imprint : Springer, , 2020
ISBN	1-4471-5616-1
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (XVI, 963 p. 1648 illus., 1591 illus. in color.)
Disciplina	617.520592
Soggetti	Oral surgery Maxillofacial surgery Surgery Traumatology Oral and Maxillofacial Surgery Traumatic Surgery
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Psychological Aspects of Posttraumatic Deformity -- Complications in Craniofacial Trauma: An Overview of Some Common Problems -- Hardware Removal in Craniomaxillofacial Trauma -- Gustatory Dysfunction -- Chronic Pain: An Overview of Causes and Management -- The Early Zygomatic Malunion -- Principles of Correction: An Overview of Secondary Correction of Posttraumatic Bony Deformities -- Three-Dimensional Facial Imaging for the Diagnosis of Complex Soft Tissue Secondary to Craniofacial Deformity -- Computer-assisted Treatment Planning in Complex Cases: Digital Technology -- Photography for Revision Surgery -- The Role of Computer-Aided Design and Three-Dimensional Printing in Posttraumatic Correction -- Orthoptic Assessment and Intervention Post-orbital Fracture Repair -- Maxillofacial Surgical Materials in Secondary Reconstruction -- Topical Negative Wound Pressure Therapy: Its Uses in Plastic and Maxillofacial Surgery -- An Overview of Augmentation of Soft Tissue Deformities Using Injectable Techniques (Fillers Versus Fat) -- Tissue Expansion for Craniofacial Defects -- Fat Grafting in Soft Tissue Augmentation -- Augmenting Soft Tissues with Fat, Dermis and Dermal Fat Grafts --

Cranioplasty, Cranial Defect, and Skull -- Hair Loss and Transplantation -- Eyebrow Reconstruction -- Secondary Management of the Orbit -- The Anophthalmic Orbit -- The Role of the Ocularist in Reconstructing the Posttraumatic Anophthalmic Orbit -- Eyelid Deformities -- Repositioning the Corners of the Eye -- The Twisted/Crooked Nose -- Nasal Augmentation -- Augmentation of the Nasal Pyramid: 'Saddle-Shaped' and Lateral Deformities -- Deformities of the Nasal Septum -- Nasal Tip Deformities -- Total and Near-Total Nasal Reconstruction -- Posttraumatic Rhinoplasty: Is There a Role for Internal Fixation? -- Nasomaxillary Osteotomy -- Zygomatic Osteotomy -- Reconstruction of Zygomatic and Periorbital Deformity with Alloplastic Material -- Contemporary Management of Traumatic Parotid-Cutaneous Communications and Fistulae -- Surgical Reconstruction of the Ear (Pinna) -- Ear Reconstruction with Temporoparietal Fascia Flaps and Porous Polyethylene -- Hearing Impairment and Tinnitus: Cochlear Implantation and Other Rehabilitative Solutions -- Management of Posttraumatic Facial Palsy -- The Management of Posttraumatic Facial Skeletal Deformity Affecting the Occlusion: The Early Malunited Mandible -- Temporomandibular Joint Disorders -- Replacing Missing Teeth: Dental Implants -- Injuries to the Teeth: Long-term Effects and Their Management -- Scar Revision and Camouflage: An Overview -- Scar Revision -- Nonsurgical Management of Traumatic Scars -- Initial Scar Management and Camouflage Techniques -- Missile Injuries: An Overview of Correction -- Vascularised Composite Allotransplantation (Face Transplantation) -- Facial Prostheses.

Sommario/riassunto

This book provides a guide to the correction of maxillofacial trauma surgery. Chapters covering the initial considerations, assessment, and techniques required in post-traumatic surgery are included to give the reader an understanding of how and why a particular procedure takes place. The treatment of eye, nose, cheek, ear, jaw, and soft tissue deformities are also discussed. Atlas of Operative Maxillofacial Trauma Surgery: Post-Traumatic Deformity aims to give a framework to trainee and practising surgeons to help them manage trauma and allow them to assess and treat patients with facial deformities.
