

1. Record Nr.	UNINA9910143587303321
Titolo	Decoding the genomic control of immune reactions [[electronic resource]]
Pubbl/distr/stampa	Chichester ; ; Hoboken, NJ, : Wiley, 2007
ISBN	1-282-34588-5 9786612345883 0-470-06212-6 0-470-06211-8
Descrizione fisica	1 online resource (230 p.)
Collana	Novartis Foundation symposium ; ; 281
Disciplina	616.0796
Soggetti	Immunogenetics Immunology Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Decoding the Genomic Control of Immune Reactions; Contents; Chair's introduction; Transcriptional regulatory networks in macrophages; DISCUSSION; The RIKEN mouse transcriptome: lessons learned and implications for the regulation of immune reactions; DISCUSSION; Molecular pathways for lymphangiogenesis and their role in human disease; DISCUSSION; GENERAL DISCUSSION I; Specifying the patterns of immune cell migration; DISCUSSION; Human monogenic disorders that confer predisposition to specific infections; DISCUSSION; The genetic control of susceptibility to <i>Mycobacterium tuberculosis</i> DISCUSSION Th2 lymphoproliferative disorders resulting from defective LAT signalosomes; DISCUSSION; Genetic analysis of systemic autoimmunity; DISCUSSION; Genetic resistance to smallpox: lessons from mousepox; DISCUSSION; The AcB/BcA recombinant congenic strains of mice: strategies for phenotype dissection, mapping and cloning of quantitative trait genes; DISCUSSION; Genetic control of host-pathogen interactions in mice; DISCUSSION; <i>Mycobacterium tuberculosis</i> and its ability to resist immunity; DISCUSSION; Systems genetics: the next generation in genetics research?; DISCUSSION

Regulation of the immune system in metazoan parasite infections
DISCUSSION; Closing remarks; Contributor Index; Subject Index

Sommario/riassunto

This book explores existing and potential strategies for using the genome sequences of human, mouse, other vertebrates and human pathogens to solve key problems in the treatment of immunological diseases and chronic infections. The assembled genome sequences now provide important opportunities for solving these problems, but a major bottleneck is the identification of key sequences and circuits controlling the relevant immune reactions. This will require innovative, interdisciplinary and collaborative strategies of a scale and complexity we are only now beginning to comprehend. Specific

Nota di contenuto

Accounting and accountability tools and practices for environmental issues: a narrative historical academic debate -- The management process underpinning the Non-financial reporting: a case study of a listed Italian company -- A Sociotechnical Analysis of Accounting for Employee Health and Safety: Evidence from a multiple case study -- Ethics, social responsibility and tax aggressiveness. Can a code of ethics absolve a company? -- Accounting for sustainability. Could cost accounting be the right tool? -- Mandatory disclosure of non-financial information: A structured Literature Review -- What drives the level of non-financial assurance in PIES? Empirical evidence on the European firms listed on Forbes 2000 -- Review and Reflections.

Sommario/riassunto

This book addresses the growing interest among policymakers, practitioners and academics in the evolution and the future implications of social, environmental and sustainability accounting. To do so, it examines the conceptual and practical application of accountability at multiple levels and contexts, and presents a range of case studies focusing on salient issues, perspectives and the potential of multidimensional accounting and reporting regimes. Intended for a diverse audience, the book allows readers to gain a better understanding of the topics, encourages dialogue and debate, and stimulates innovation in scholarship, policy and practice. .
