Sommario/riassunto	The aim of this workshop is to bring together researchers, from industry and academia, concerned with the qualitative and quantitative evaluation and modeling of high performance computing systems Authors are invited to submit novel research in all areas of performance modeling, benchmarking and simulation, and we welcome research that brings together current theory and practice We recognize that the coverage of the term performance has broadened to include power consumption and reliability and that performance modeling is practiced through analytical methods and approaches based on software tools and simulators.
