Sommario/riassunto	This Standard defines a World Wide Web Consortium (W3C) Extensible Markup Language (XML) Schema definition language binding of the learning object metadata (LOM) data model defined in IEEE Std 1484.12.1TM-2002. The purpose of this Standard is to allow the creation of LOM instances in XML, which allows for interoperability and the exchange of LOM XML instances between various systems. This Standard uses the W3C XML Schema definition language to define the syntax and semantics of the XML encodings.

Sommario/riassunto	"The strength of this volume cannot be conveyed by an itemisation of its contents; for what it provides is an incisive commentary on the newly-recognised landmarks of Irish agrarian history in the modern period.... The importance, even indispensability, of this achievement is compounded by exemplary editing."-Roy Foster, London Times Literary Supplement "As a whole, the volume demonstrates the wealth, complexity, and sophistication of Irish rural studies. The book is essential reading for anyone involved in modern Irish history. It will also serve as an excellent introduction to this rich field for scholars of

other peasant communities and all interested in problems of economic and political developments."- American Historical Review "A milestone in the evolution of Irish social history. There is a remarkable consistency of style and standard in the essays.... This is truly history from the grassroots."-Timothy P. O'Neill, *Studia Hibernica*
