Titolo	Agricultural Drought in Slovakia: An Impact Assessment : NDVI and Satellite Based Data // by Veronika Zuzulová, Jaroslav Vido, Bernard Šiška
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-42061-2
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (IX, 90 p. 75 illus., 69 illus. in color.)
Collana	SpringerBriefs in Environmental Science, , 2191-5547
Disciplina	551.5773
Soggetti	Remote sensing Agriculture Meteorology Climate change Physical geography Ecology Remote Sensing/Photogrammetry Climate Change World Regional Geography (Continents, Countries, Regions) Ecology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1. Introduction/motivation -- 2. State of the art -- 3. Material and methods -- 4. Results -- 5. Conclusions -- References.
Sommario/riassunto	This book gives an insight into the evaluation of drought in Slovakia and provides an assessment of Normalized Difference Vegetation Index (NDVI) as a method suitable for an evaluation of drought in agricultural land. Dry seasons in the time series from 1960 to 2014 were determined according to the monthly Palmer Drought Severity Index (PDSI). The field research was carried out on 12 sites including western Slovakia, Prešov, Trnava and Nitra regions. Data collected from satellite imagery, climate data analyses and drought indices was analysed to determine the value of NDVI as an evaluation tool.
