

1. Record Nr.	UNINA9910392734703321
Titolo	Pharmacy Practice Research Methods // edited by Zaheer-Ud-Din Babar
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2020
ISBN	981-15-2993-0
Edizione	[2nd ed. 2020.]
Descrizione fisica	1 online resource (271 pages)
Disciplina	615.1068
Soggetti	Pharmacology Pharmacy Medicine - Practice Hospitals - Administration Practice and Hospital Management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1. Pharmacy Practice Research: Evidence, Impact and synthesis -- Chapter 2. Qualitative Methods in Pharmacy Practice Research -- Chapter 3. Action Research in Pharmacy Practice -- Chapter 4. Quality Improvement Methods in Pharmacy Practice Research -- Chapter 5. Covert and overt observations in Pharmacy practice -- Chapter 6. Realist Research in Pharmacy Practice -- Chapter 7. Importance of Mixed Methods Research in Pharmacy Practice -- Chapter 8. Grounded theory in pharmacy practice research -- Chapter 9. Pharmacoepidemiology and Pharmacoepidemiological research -- Chapter 10. Randomized Control Trials and pharmacy practice research -- Chapter 11. Information sources for pharmacy practice researchers -- Chapter 12. Systematic reviews and meta analysis in pharmacy practice research -- Chapter. 13. The future of pharmacy practice research.
Sommario/riassunto	The first edition of Pharmacy Practice Research Methods provided a contemporary overview of pharmacy practice research, discussing relevant theories, methodologies, models and techniques. It included chapters on a range of quantitative, qualitative, action research and mixed methods as well as management theories underpinning change

in pharmacy practice. This new edition of the book is much broader and more diversified. It includes the quality improvement methods in pharmacy practice research, focusing on the key differences between high and low-income countries with regard to pharmacy practice research, as well as the main challenges faced when conducting such research – areas of significant global interest. In addition, a number of the chapters covering fast-moving fields where new methods have been developed and published have been updated. Featuring seven new topics and presenting future trends, the book also explains in detail methods used in covert and overt observations in pharmacy practice, as well as methods involved in realist research, which are important to countries seeking to produce evidence-based information in this area.
