A New Actor for European Football -- 7. Becoming a Leading Continental Confederation -- 8. Conclusion. .
Sommario/riassunto	"Vonnard's publication on UEFA is both in empirical and conceptual terms a pioneering work for the research on European football. It is the first comprehensive source-based study on UEFA and offers new insights into the working methods and self-images of a key player in European cooperation. At the same time, the book provides a wealth of information for the historical analysis of international sports organisations." - Jürgen Mittag, Jean Monnet Chair of Political Science and Sport, German Sport University Cologne, Germany "While it may not

presently be possible to get inside the walls of UEFA's world, we do have this granular account of the organization's early days and origins. Vonnard has gone beyond the obvious to find sources in all sorts of places and retell the story with great professionalism and meticulousness. It is a history about one of the very few examples of detente years before there was detente." -Robert Edelman, Professor of History at the University of California San Diego, USA "Vonnard demonstrates the vital role that football played in integrating Europeans and European society in the turbulent post-war era of decolonisation and the Cold War, helping to bridge the gap between the Western and Eastern blocs, and lay the basis for decades of European cooperation in sport and beyond." - Matthew Taylor, Professor of History, De Montfort University, UK Philippe Vonnard is SNSF Senior Researcher at the University of Lausanne, Switzerland.
