Nota di contenuto	Chapter 1 Foundation for Chinese Research on Grand Strategy -- Chapter 2 Evaluation of China's National Power -- Chapter 3 Optimization of China's Strategic Ideas -- Chapter 4 China's Participation in International Institutions -- Chapter 5 China's Grand Strategy: A Framework.
Sommario/riassunto	This book aims to build the ideal model of China's grand strategy framework, which is based on three key variables: national power, strategic concept and international institution. Taking the rise of China as an opportunity, this book adopts the assessment of national strategic resources as the beginning, focuses on the evaluation of strategic capability, the choice of strategic orientation, the establishment of strategic objectives, the planning of strategic content and the implementation of strategic means. Further, following this main line, this book establishes a China's grand strategy framework based on active participation and integration-transformation-shaping process. This book emphasizes that to achieve the goals of China's grand strategy; China should uphold this strategic attitude: It should not be seduced by praise and should not be made aggressive by

criticism. It should learn to be glorious but remain humble, maintain a wealthy, influential but modest position by restraint. This book can be regarded as the essence of the author's 20 years long-term focus and research on the China's grand strategy. The author's postdoctoral tutor Professor Hu Angang's comment of this book can hit the nail on the head: "This book is a pioneering theoretical study of China's great strategic research and makes a significant contribution to this research field. The basic arguments of this book have been submitted through various approaches to decision-making references or published in academic papers, and have received numerous positive responses and resonance. In my opinion, the basic ideas and important findings of this book will provide imperative reference to long-term strategy decision-making process. In addition, the fundamental theory and analysis method of the book will have an important influence in both domestic and international academic field.".
