Note generali	"The present ... edition has been edited ... by Dietrich von Bothmer from the manuscripts and notes of the translators. Besides many changes in the poems, it contains additional translations intended to give a representative survey of Stefan George's earliest poems (which appeared in The primer), of his dramatic sketches (volume XVII of his Collected works), and of his prose writings (Days and deeds)."
Sommario/riassunto	This translation of all the poems in the main body of the work of George extensively revises the first publication of The Works of Stefan George which appeared in 1949. The editors have also expanded the volume, adding a number of George's early poems under the collective title Drawings in Grey, two essays (including the eulogy on Holderlin), and the lyrical drama The Lady's Praying along with a commentary by the translators.
