1. Record Nr. UNINA9910398186003321

   Titolo Competitividad turística como motor de desarrollo regional. Un estudio del clúster de turismo en el Suroeste antioqueño

   Pubbl/distr/stampa Ediciones Universidad Cooperativa de Colombia

   Lingua di pubblicazione Inglese

   Formato Materiale a stampa

   Livello bibliografico Monografia

2. Record Nr. UNISA996465546503316

   Titolo Embedded and Ubiquitous Computing [[electronic resource]] : International Conference EUC 2004, Aizu-Wakamatsu City, Japan, August 25-27, 2004, Proceedings / / edited by Laurence T. Yang, Minyi Guo, Guang R. Gao, Niraj K. Jha

   Pubbl/distr/stampa Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2004

   ISBN 3-540-30121-6

   Edizione [1st ed. 2004.]

   Descrizione fisica 1 online resource (XL, 1116 p.)

   Collana Lecture Notes in Computer Science, , 0302-9743 ; ; 3207

   Disciplina 004.16

   Soggetti User interfaces (Computer systems)
   Computer communication systems
   Special purpose computers
   Application software
   Information storage and retrieval
   Computers and civilization
   User Interfaces and Human Computer Interaction
   Computer Communication Networks
   Special Purpose and Application-Based Systems
   Information Systems Applications (incl. Internet)
   Information Storage and Retrieval
   Computers and Society

   Lingua di pubblicazione Inglese

   Formato Materiale a stampa

   Livello bibliografico Monografia

Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Track 1: Embedded Hardware/Software -- Track 2: Real-Time Systems -- Track 3: Power-Aware Computing -- Track 4: Hardware/Software Co-design and System-on-Chip -- Track 5: Mobile Computing -- Track 6: Wireless Communication -- Track 7: Multimedia and Pervasive Computing -- Track 8: Agent and Distributed Computing -- Track 9: Network Protocol, Security, and Fault-Tolerance -- Track 10: Middleware and Peer-to-Peer Computing -- Keynote Speech.
Sommario/riassunto	Welcome to the proceedings of the 2004 International Conference on Embedded and Ubiquitous Computing (EUC 2004) which was held in Aizu-Wakamatsu City, Japan, 25–27 August 2004. Embedded and ubiquitous computing are emerging rapidly as exciting new paradigms and disciplines to provide computing and communication services all the time, everywhere. Its systems are now invading every aspect of life to the point that they are disappearing inside all sorts of appliances or can be worn unobtrusively as part of clothing and jewelry, etc. This emergence is a natural outcome of research and technological advances in embedded systems, pervasive computing and communications, wireless networks, mobile computing, distri- ted computing and agent technologies, etc. Its explosive impact on academia, industry, government and daily life can be compared to that of electric motors over the past century but promises to revolutionize life much more profoundly than elevators, electric motors or even personal computer evolution ever did. The EUC 2004 conference provided a forum for engineers and scientists in academia, industry, and government to address all the resulting profound ch- lenges including technical, safety, social, legal, political, and economic issues, and to present and discuss their ideas, results, work in progress and experience on all aspects of embedded and ubiquitous computing. There was a very large number of paper submissions (260) from more than 20countriesandregions,includingnotonlyAsiaandthePaci?c, butalsoEurope and North America. All submissions were reviewed by at least three program or technical committee members or external reviewers.
