

1. Record Nr.	UNINA9910401935603321
Titolo	Corporate Biodiversity Management for Sustainable Growth : Assessment of Policies and Action Plans // edited by Ravi Sharma, Aparna Watve, Amitabh Pandey
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-42703-X
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (XXIV, 235 p. 27 illus., 25 illus. in color.)
Collana	Environment & Policy, , 2215-0110 ; ; 59
Disciplina	333.9516
Soggetti	Industrial management - Environmental aspects Sustainability Biodiversity Conservation biology Ecology Climatology Environmental management Corporate Environmental Management Conservation Biology Climate Sciences Environmental Management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	This book aims to cover the multitude of corporate approaches towards mainstreaming biodiversity conservation and ecological management in policies and action plans, and explores the roles of these efforts in achieving national and global targets for the Sustainable Development Goals (SDGs). The book addresses various aspects of corporate actions such as corporate environmental responsibility, green businesses, market-based approaches to biodiversity conservation, and biodiversity trade-offs, and includes concept papers, reviews, and case studies presenting qualitative and quantitative research. Additionally, the text

compares and assesses examples of positive and negative impacts of corporate involvement in biodiversity conservation in developed and developing countries to identify innovative approaches, and the best practices and models that can be replicated in diverse environmental conditions. The studies included in the book will help those working in the field of corporate involvement in biodiversity conservation, and outline the strengths and weaknesses of the approaches which will be useful for designing new environmental management action plans in the face of climate change. The book will also be of great value to researchers, academicians, policy makers, civil society groups, policy think tanks, and conservation managers.
