

1.	Record Nr.	UNICAMPANIAVAN0017904
	Titolo	Bion e la psicoterapia di gruppo / a cura di Malcolm Pines ; edizione italiana a cura di Antonio Correale
	Pubbl/distr/stampa	Roma, : Borla, [1988]
	Titolo uniforme	Bion and group psychotherapy <in italiano>
	ISBN	88-263-0548-X
	Descrizione fisica	351 p. ; 21 cm.
	Disciplina	616.89152
	Soggetti	Psicoterapia di gruppo Bion, Wilfred Ruprecht
	Lingua di pubblicazione	Italiano
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910404079803321
	Autore	Chagnes Alexandre
	Titolo	Advances in Hydrometallurgy
	Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2020
	ISBN	3-03928-940-3
	Descrizione fisica	1 online resource (188 p.)
	Soggetti	History of engineering and technology
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Sommario/riassunto	The development of new technologies and the increasing demand for mineral resources from emerging countries are responsible for significant tensions in the pricing of non-ferrous metals. Some metals

have become strategic and critical because they are used in many technological applications such as flat panel TVs (indium), solar panel cells (indium), lithium-ion batteries for electric vehicles (lithium, cobalt), magnets (rare earth elements, such as neodymium and dysprosium), scintillators (rare earths), and aviation and medical applications (titanium); their availabilities remain limited. The secured supply of these metals is crucial to continue producing and exporting these technologies, and because the specific properties of these metals make them essential and difficult to substitute for a given industrial application. Hydrometallurgy have the advantages of being able to process low-grade ores, to allow better control of co-products, and have a lower environmental impact providing that the hydrometallurgical route is optimized and cheap. The need to develop sustainable, efficient, and cheap processes to extract metals from complex and poor polymetallic matrices is real. The aim of this book was to highlight recent advances related to hydrometallurgy to face new challenges in metal production.
