

1. Record Nr.	UNINA9910416134603321
Autore	Braun Klaus
Titolo	Across the Sahara : tracks, trade and cross-cultural xchange in Libya / / edited by Klaus Braun, Jacqueline Passon
Pubbl/distr/stampa	Springer Nature, 2020 Cham, Switzerland : , : Springer International Publishing : , : Imprint : Springer, , [2020] ©2020
ISBN	3-030-00145-8
Descrizione fisica	1 online resource (xviii, 260 pages) : illustrations (some colour); digital file(s)
Disciplina	330.0096
Soggetti	Africa—Economic conditions Historical geography Africa, North—History Remote sensing Ethnology—Africa
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Foreword by Prof. Dr. Mohammend Jerary -- Introduction -- Across the vast land -- A journey through time -- Traders, Nomads and Slaves -- Navigating and mapping the "white spot" -- On major trans-Saharan trails -- Places of Trade, Communication and Religion - Important Oases -- Bibliography.
Sommario/riassunto	This open access book provides a multi-perspective approach to the caravan trade in the Sahara during the 19th century. Based on travelogues from European travelers, recently found Arab sources, historical maps and results from several expeditions, the book gives an overview of the historical periods of the caravan trade as well as detailed information about the infrastructure which was necessary to establish those trade networks. Included are a variety of unique historical and recent maps as well as remote sensing images of the important trade routes and the corresponding historic oases. To give a deeper understanding of how those trading networks work, aspects

such as culturally influenced concepts of spatial orientation are discussed. The book aims to be a useful reference for the caravan trade in the Sahara, that can be recommended both to students and to specialists and researchers in the field of Geography, History and African Studies.

Titolo	Mineralogy of Noble Metals and "Invisible" Speciations of These Elements in Natural Systems
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2020
ISBN	3-03928-635-8
Descrizione fisica	1 online resource (224 p.)
Soggetti	Earth sciences, geography, environment, planning
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This Special Issue covers a broad range of topics related to the mineralogy of noble metals (Au, Ag, Pt, Pd, Rh, and Ru) and the occurrence, formation, and distribution of these elements in natural ore-forming systems. This collection of eleven research articles discusses various problems related to these topics. I hope this Special Issue will contribute to a better understanding of the genesis of gold, silver, and other noble metal deposits as well as the behavior of these elements in endogenic and supergene environments, and suggest ways forward to solving the problem of their full extraction from ores.
