Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Early Anglo-Saxon cemeteries are known for their grave goods, but this abundance obscures their interest as the creations of pluralistic, multi-generational communities. This book explores over one hundred early Anglo-Saxon and Merovingian cemeteries, using a multi-dimensional methodology to move beyond artefacts. It offers an alternative way to explore the horizontal organisation of cemeteries from a holistically focused perspective. The physical communication of digging a grave

and laying out a body was used to negotiate the arrangement of a cemetery and to construct family and community stories. This approach foregrounds community, because people used and reused cemetery spaces to emphasise different characteristics of the deceased, based on their own attitudes, lifeways and live experiences. This book will appeal to scholars of Anglo-Saxon studies and will be of value to archaeologists interested in mortuary spaces, communities and social archaeology.

Livello bibliografico	Monografia
Sommario/riassunto	The biennial Congress of the Italian Society of Oral Pathology and Medicine (SIPMO) is an International meeting dedicated to the growing diagnostic challenges in the oral pathology and medicine field. The III International and XV National edition will be a chance to discuss clinical conditions which are unusual, rare, or difficult to define. Many consolidated national and international research groups will be involved in the debate and discussion through special guest lecturers, academic dissertations, single clinical case presentations, posters, and degree thesis discussions. The SIPMO Congress took place from the 17th to the 19th of October 2019 in Bari (Italy), and the enclosed copy of Proceedings is a non-exhaustive collection of abstracts from the SIPMO 2019 contributions.
