

1. Record Nr.	UNINA9910404086403321
Autore	Khutoryanskiy Vitaliy
Titolo	Advances in Mucoadhesive Polymers and Formulations for Transmucosal Drug Delivery
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2020
ISBN	3-03928-753-2
Descrizione fisica	1 online resource (206 p.)
Soggetti	Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Mucoadhesive polymers are widely used in the design of dosage forms for transmucosal drug delivery to the eye, respiratory, gastrointestinal and reproductive tracts. These routes of drug administration offer a number of advantages including improved drug bioavailability, reduced frequency of administration, and the avoidance for the use of injections.
