Nota di contenuto	Front Matter -- Copyright -- Abbreviations, Coinage, Weights, and Measures -- Introduction -- Galleys on the Coast! -- Captures, Commerce, and Corruption -- Resistance, Consensus, and Solidarity -- Conclusion -- Back Matter -- Bibliography -- Index.
Sommario/riassunto	The development of the Spanish Navy in the early modern Mediterranean triggered a change in the balance of political and economic power for the coastal populations of the Hispanic Monarchy. The establishment of new permanent squadrons, endowed with very broad jurisdictional powers, was the cause of many conflicts with the local authorities and had a direct influence on the economic and production activities of the region. Manuel Lomas analyzes the progressive consolidation of these institutions in the sixteenth and seventeenth centuries, their influence on the mechanisms of justice and commerce, and how they contributed to the reconfiguration of the jurisdictional system that governed the maritime trade in the Mediterranean.

Discussion; The epidemiology of the mycosis: some comments in relation to a particular case of sporotrichosis; Discussion; The effect of temperature on the deep mycoses; Discussion; The epidemiology of phycomycosis; Discussion; General discussion : epidemiology; Therapy; Some biological activities of antifungal antibiotics and their mode of action; Discussion
Clinical application and side effects of antifungal agents Discussion; Problems of assessment of antifungal drugs; Discussion; General discussion : therapy; Group discussion; Chairman's closing remarks; Author Index; Subject Index

Sommario/riassunto

The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia, in which groups of leading scientists from a range of topics across biology, chemistry and medicine assembled to present papers and discuss results. The Novartis Foundation, originally known as the Ciba Foundation, is well known to scientists and clinicians around the world.
