| Sommario/riassunto | <p>The author examines the practice of video interrogation for children witnesses. Starting point for their empirical investigation is the question of whether the law reform is not only meant well, but can be implemented practically. Here the author builds on the regulations of the 1998 established law for witness protection, to its feasibility in terms of the intended effective protection of victims, particularly the avoidance of so-called secondary victimization (trauma), experts from the federal state of Lower Saxony - prosecutors, police and courts - report by their own experiences. In five selected district courts of Lower Saxony, the author has also conducted an extensive document analysis on the use of video testimony, and concluded that the video technology in criminal proceedings is used rarely. In specific reform proposals "de lege ferenda" also the recent regulations of the Law Reform Act of 2003 victims are included in the evaluative study.</p> |

Customers' Opinions Towards Product Characteristics Using Social Media -- Millennial Travelers' Perception of Terrorism Risks: Evidence From Poland and Slovakia.

Sommario/riassunto

This book gathers selected theoretical and empirical papers from the 28th Eurasia Business and Economics Society (EBES) Conference, held in Coventry, United Kingdom. Covering diverse areas of business and management in various geographic regions, it highlights the latest research on human resources, management and marketing, among other topics. It also includes related studies that address management and marketing aspects such as telecommuting versus the traditional work environment, the effect of value congruence, promoting product characteristics using social media, perception of terrorism risks, and personal innovativeness and employability.
