

1. Record Nr.	UNINA9910407727903321
Autore	Leonardo Eugenio
Titolo	Practical Immunocytochemistry in Diagnostic Cytology // by Eugenio Leonardo, Ricardo H. Bardales
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-46656-6
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (182 pages)
Disciplina	616.07582
Soggetti	Pathology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Preface -- Immunocytochemistry: Technical Considerations Applied to Cytology -- Serous Effusions -- Exfoliative Cytology -- Aspiration Cytology of Masses of Superficial Organs -- Aspiration Cytology of Deep-Seated Masses -- Pitfalls in Immunocytochemistry.
Sommario/riassunto	This book provides current information for a judicious use of conventional and molecular ICC markers performed in cytologic samples to help in the cost-effective diagnosis of superficial and deep-seated masses. By providing both an eminently practical information for appropriate technical preparation of cytologic samples and a systematic exposure of the immunophenotypic and biomolecular characteristics of normal and pathological cells, the reported morphological-molecular findings highlight the characteristics of different lesions that are useful for the practical solution of a particular differential diagnosis. Chapters include description of the cytomorphology followed by a practical ICC staining pattern for each entity. Cytologic materials include serous effusions, exfoliative cytology, fine needle aspiration cytology of superficial and deep-seated masses, and squash preparation from central nervous system masses. Practical Immunocytochemistry in Diagnostic Cytology serves as a valuable resource towards understanding critical differences between tests performed on tissue samples and those carried out on cytologic samples.
