

1. Record Nr.	UNINA9910407728203321
Titolo	New Directions in Psychiatry [[electronic resource] /] / edited by Maurizio Pompili, Roger McIntyre, Andrea Fiorillo, Norman Sartorius
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-42637-8
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (viii, 230 pages) : illustrations
Disciplina	616.89
Soggetti	Psychiatry Nursing Psiquiatria Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Foreword -- Preface.-1.Unmet needs in modern psychiatric practice.-2. Unmet needs in patients with schizophrenia -- 3.The Unmet Needs for Major Depressive Disorder.-4.Unmet Needs in Psychiatry: Bipolar Depression.-5.Unmet needs in mixed-states.-6.Unmet needs in personality disorders.-7.Unmet needs in the assessment and treatment of psychomotor agitation.-8.Unmet needs in the management of suicide risk.-9.Unmet needs in education in psychiatry.-10.Unmet needs of resident's.-11.Unmet needs in youth mental health: transforming models of care to improve outcomes.-12.Classification systems of mental disorders – where did we go wrong?.-13.Stigma: an old unmet need in psychiatric practice.
Sommario/riassunto	This book focuses on hot issues faced by clinicians in everyday clinical practice, and provides in-depth analyses of both met and unmet needs in the management of psychiatric disorders. It has been repeatedly shown that the needs of patients, relatives, the community at large and those of the governmental bodies only partially overlap. For instance, patients in their families are more concerned about quality of life, treatment, autonomy, and independent living; whereas governmental stakeholders are typically more concerned about relapse prevention and reduction of hospitalizations. As such, a volume bridging the gap

between theoretical notions and practical understanding of patients' untreated aspects of their psychiatric disorders is much needed. Instead of focusing on traditional descriptions of psychopathology and diagnostic criteria, the volume guides readers to core problems for each topic, taking into account new approaches in the classification of mental disorders as proposed by DSM-5. It elaborates on much-debated controversial problems such as the assessment and treatment of psychomotor agitation, and non-adherence to treatment that impacts on the psychiatric context. With its unique approach, this volume appeals to anyone with an interest in the field, including researchers, clinicians, and trainees.
