Nota di contenuto	Overview -- Development of World Information Infrastructure -- World Network Information Technology Development -- World Digital Economy Development -- Opening-up of Global Governmental Data -- Five World Internet Media Development -- World Cyber Security Development -- Rule of Law for World Internet -- International Cyberspace Governance -- Afterword.

Sommario/riassunto

This book is an important outcome of the Fifth World Internet Conference. It provides a comprehensive account of the new trends and highlights of global Internet development over the past year, covering network infrastructure, information technology, digital economy, world internet media, cyber security, and international cyberspace governance. This year, the book improves the Global Internet Development Index System and adds more countries into the assessed list, in order to reflect more comprehensively, objectively and accurately the general situation of the world Internet development and thus to provide reference for all countries in promoting Internet development and governance.
