

1. Record Nr.	UNINA9910407739203321
Autore	Li Xinyu
Titolo	Effective Methods for Integrated Process Planning and Scheduling // by Xinyu Li, Liang Gao
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2020
ISBN	3-662-55305-8
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (xvi, 462 pages)
Collana	Engineering Applications of Computational Methods, , 2662-3374 ; ; 2
Disciplina	658.53
Soggetti	Industrial engineering Production engineering Artificial intelligence Operations research Application software Mathematical models Industrial and Production Engineering Artificial Intelligence Operations Research and Decision Theory Computer and Information Systems Applications Mathematical Modeling and Industrial Mathematics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Problem Review -- Methods for single objective problem -- Methods for the Multi-objectives problem -- Dynamic scheduling -- Application.
Sommario/riassunto	This book summarizes a series of research work on integrated process planning and scheduling (IPPS) done by the authors, focusing on discussing the properties, novel solution methods and applications of process planning, scheduling and IPPS problems under different machining environments. It is a valuable reference resource for teachers, students and researchers working in the fields of engineering, management science and other related disciplines.
