Livello bibliografico	Monografia
Nota di contenuto	The Behavioral Economics of Accuracy and Discrimination at Trial -- Truth Standards in Behavioral Law and Economics -- The Fundamental Attribution Error and Accuracy in Trial Settings: Judges vs Jurors -- Implicit Racial Biases in Tort Trials -- Gender and Race-Based Statistical Tables in European Tort Trials -- Accuracy and Discrimination at Trial: Putting the Pieces Together.
Sommario/riassunto	Goran Dominioni argues that research in behavioral economics, psychology, and neurosciences can offer novel insights on whether court decisions are accurate, non-discriminatory, and maximize social welfare. The author also shows that insights from these areas of research can help to improve trial outcomes if carefully applied to craft trial rules and practices. He covers central themes in behavioral law and economics, such as implicit racial biases, the fundamental attribution error, and gender-related biases. Contents The Behavioral Economics of Accuracy and Discrimination at Trial Truth Standards in Behavioral Law and Economics The Fundamental Attribution Error and Accuracy in Trial Settings: Judges vs Jurors Implicit Racial Biases in Tort Trials Gender and Race-Based Statistical Tables in European Tort Trials Accuracy and Discrimination at Trial: Putting the Pieces Together Target
