

1. Record Nr.	UNINA9910409846803321
Titolo	Microbial physiology
Pubbl/distr/stampa	Basel : , : Karger, , [2020]-
ISSN	2673-1673
Descrizione fisica	1 online resource
Soggetti	Microbiology Microbiological Phenomena Microbiologie Periodical Periodicals.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	Refereed/Peer-reviewed
Sommario/riassunto	"We are entering a new and exciting era of microbiological study and application. Recent advances in the now established disciplines of genomics, proteomics, and bioinformatics, together with extensive cooperation between academic and industrial concerns, have brought about an integration of basic and applied microbiology as never before. Microbial Physiology aims to reflect this development by publishing original research papers from all areas of microbiology and biotechnology. It also features written symposia on selected topics, timely reviews, and mini-reviews. Theoretical approaches and descriptions of novel, microbiologically relevant software are also considered. Contributions and ideas from large segments of the scientific community are welcome to make Microbial Physiology a viable, much needed, and up-and-coming forum for current basic and applied microbiological research"--Publisher.
